Global High Dividend Value ADR

STRATEGY OVERVIEW

In 1994, for investors more concerned with risk, Schafer Cullen Capital Management began managing portfolios with the Schafer Cullen High Dividend Value Equity strategy. The High Dividend strategy takes a more conservative approach by including a high yield component to our low P/E discipline.

In 2001, for investors seeking higher levels of current income and global equity exposure we began the SCCM Global High Dividend strategy. This strategy provides investors with a way to participate in the upside potential of global equities while at the same time generating current income and benefiting from greater than average downside protection, given dividend yield support.

Here, we select global stocks that combine the following:

- ▶ **LOW P/E DISCIPLINE**
- ▶ **HIGH DIVIDEND YIELDS**
- ▶ **STRONG DIVIDEND GROWTH**

We invest primarily in U.S. companies & International companies that trade on global exchanges with market capitalizations in excess of \$1 billion. While the global markets provide considerable upside potential, they are also exposed to additional political and currency risk. We believe the combination of low P/E, high dividend yield and dividend growth should mitigate this risk and reduce the overall volatility of the portfolio.

Global High Dividend Value ADR

INVESTMENT DECISION PROCESS

INITIAL SCREEN:

Bottom up approach which begins with a universe of international stocks, with a market capitalization generally over \$1 billion and dividend yield greater than 3%.

SCREEN FOR VALUE:

- Price to earnings ratio which is less than the market multiple
- Long term earnings growth prospects that are greater than the market multiple
- High-dividend yields & strong dividend growth rate potential

FUNDAMENTAL RESEARCH:

- High standards with regard to cash flow, debt to capitalization, price to book, EV to EBITDA, return on equity, payout ratios and other measures of financial strength
- Leading market share, favorable business prospects, competitive advantages and other identifiable catalysts for price, EPS & DPS appreciation
- Meetings and discussions with management, industry analysts, suppliers and customers
- Tax efficient structures, high net dividend yields and attractive dividend policies
- Unique geographic, business and quantitative exposure
- Improving or stable political and currency risk

PORTFOLIO CONSTRUCTION:

- Diversification across approximately 45-55 stocks
- No more than 5% invested in any one stock at cost
- No more than 20% invested in any one industry at cost
- Generally, no more than 30% invested in any one country at cost
- Generally, low cash balances

SELL DISCIPLINE:

- Price to earnings multiple not justified by earnings growth rate
- Deteriorating fundamentals, negative business trend or change in investment thesis
- Change in dividend policy or significant decline in yield due to price appreciation
- Change in structure negatively impacting tax efficiency

FOOTNOTES:

¹Includes model program assets of \$9.0 billion as of 12/31/2018. SCCM provides models on the following SMA strategies: High Dividend, International High Dividend, Value Equity, and Global High Dividend.

DISCLOSURE:

Schafer Cullen Capital Management (SCCM) is an independent investment advisor registered under the Investment Advisers Act of 1940. Cullen Capital Management, LLC (CCM) and Cullen Funds Trust are affiliates of SCCM. The use of the term "firm" in describing total assets refers to SCCM and CCM only.

Past performance does not guarantee future results. Investors should be aware of the following two items when reviewing performance: (i) Returns noted prior to 2005 are represented by a single account; and (ii) Prior to 2008, the composite benchmark was the MSCI EAFE. In 2008, the composite benchmark was changed to the S&P Global 1200, as the investment adviser believes it more accurately comparative benchmark for the strategy. The S&P Global 1200 Index is a free-float weight index composed seven regional indices spanning 31 countries. The MSCI World Index is a free float-adjusted market capitalization weighted index designed to measure the equity market performance of developed markets and is not a benchmark for the strategy. It is included in this presentation solely for comparative purposes.

Returns are expressed in US dollars. Gross of fee performance is calculated gross of management fees and custodian fees and net of transaction costs. Net of fee performance is calculated net of actual management fees and transaction costs but gross of custodian fees. Performance for the Global High Dividend Value Equity is a preliminary net of fees estimate. This estimate is a result of the non-standardized method for the accrual and settlement of international dividends in the numerous jurisdictions in which the portfolio invests. Additional information regarding policies for calculating and reporting returns is available upon request. Individual account performance will not match the composite and will depend upon various factors including market condition at the time of investment. Returns reflect the reinvestment of dividends and other earnings. It should not be assumed that recommendations made in the future will be as profitable or surpass the historical performance of the securities in the composite.

This presentation is not a solicitation or recommendation to buy or sell a particular security. A complete list of all recommendations made by the investment adviser within the immediately preceding period of not less than one year is available upon request. SCCM claims compliance with the Global Investment Performance Standards (GIPS®). SCCM has received a Firm-wide GIPS Verification for the period 1994-2018. To receive a complete list and description of SCCM's composites and/or a presentation, contact Steve Mullooly at (212) 644-1800, smullooly@schafer-cullen.com, write Schafer Cullen Capital Management, 645 Fifth Avenue, Suite 1201, New York, New York 10022 or visit our website: www.schafer-cullen.com.

* This information is provided for your information and is supplemental to GIPS.

** The MSCI World Index is shown for comparative purposes only and is not the benchmark for the strategy. The benchmark for the Global High Dividend Value is the S&P 1200. Portfolio characteristics are not available for the S&P 1200. 20190129.55324
