See Notes to Quarterly Schedule of Investments.

- (a) Securities were originally issued pursuant to Regulation S under the Securities Act of 1933, which exempts securities offered and sold outside of the United States from registration. Such securities cannot be sold in the United States without either an effective registration statement filed pursuant to the Securities Act of 1933, or pursuant to an exemption from registration. As of September 30, 2020, the aggregate value of those securities was \$17,191,122, which represents 7.02% of net assets.
- (b) Security exempt from registration of the Securities Act of 1933. These securities may be resold in transactions exempt from registration under Rule 144A, normally to qualified institutional buyers. As of September 30, 2020 the aggregate value of those securities was \$10,568,668, which represents 4.32% of net assets.
- (c) Non-Income Producing Security.

Notes to Portfolio of Investments September 30, 2020 (unaudited)

Note 1 – Valuations of Securities

Securities that are primarily traded on a national or foreign securities exchange are valued at the last sales price on the exchange on which they are primarily traded on the day of valuation or, if there has been no sale on such day, at the mean between the bid and asked prices. Securities primarily traded in the National Association of Securities Dealers Automated Quotation (“NASDAQ”) National Market System for which market quotations are readily available are valued using the NASDAQ Official Closing Price (“NOCP”). If the NOCP is not available, such securities are valued at the last sale price on the day of valuation, or if there has been no sale on such day, at the mean between the bid and asked prices. Money market mutual funds are valued at the net asset value (“NAV”) of shares held by the Funds on the day of valuation. Any securities or other assets for which market quotations are not readily available are valued at fair value as determined in good faith by the Valuation Committee of the Funds’ Board of Trustees (the “Board”) under supervision of the full Board. The values for foreign securities are reported in local currency and converted to U.S. dollars using currency exchange rates at the time of valuation. Exchange rates are provided daily by recognized independent pricing agents.

Option contracts shall typically be valued using reliable market quotations from the primary exchange on which the respective options are traded on the day of valuation or, if there has been no trade on such day, at the mean between the bid and asked prices. Any options for which market quotations are not readily available are valued at fair value as determined in good faith by the Valuation Committee of the Funds’ Board of Trustees under supervision of the Board, which may include a Black-Scholes model, the Cox-Rubenstein Binomial Option Pricing Model, or other appropriate option pricing model deemed appropriate. As of September 30, 2020, all written option contracts held are exchange-traded.

The Funds may gain exposure to securities in certain foreign markets through investments in participatory notes (“P-notes”). The Fund may purchase P-notes pending ability to invest directly in a foreign market due to restrictions applicable to foreign investors or other market factors. P-notes are generally issued by banks or broker-dealers and are designed to offer a return linked to a particular underlying security. P-notes involve transaction costs, which may be higher than those applicable to the equity securities. An investment in a P-note may involve risks, including counterparty risk, beyond those normally associated with a direct investment in the underlying security. The Fund must rely on the creditworthiness of the counterparty and would have no rights against the issuer of the underlying security. Furthermore, the P-note’s performance may differ from that of the underlying security. The holder of the P-note is entitled to receive from the bank or broker-dealer, an amount equal to dividends paid by the issuer of the underlying security; however, the holder is not entitled to the same rights (e.g., dividends, voting rights) as an owner of the underlying security. There is also no assurance that there will be a secondary trading market for a P-note or that the trading price of a P-note will equal the value of the underlying security. P-notes are generally valued based upon the value of a related underlying security that trades actively in the market.

Portfolio securities that are primarily traded on foreign securities exchanges are generally valued at the last reported trade or closing price of such securities on their respective exchanges, except when an occurrence subsequent to the time a value was so established is likely to have changed such value. In such an event, the fair value of those securities is determined in good faith through consideration of other factors in accordance with procedures established by, and under the general supervision of, the Board of Trustees. Certain Funds will use a fair valuation model provided by independent pricing vendors, which is intended to reflect fair value when a security’s value is believed to have been materially affected by a valuation event that has occurred between the close of the exchange or market on which the security is traded and the close of the regular trading day of the NYSE. The Funds’ procedures set forth certain triggers that instruct when to use the fair valuation model. The value assigned to a security by the fair valuation model is a determination of fair value made under the Funds’ valuation procedures and under the supervision of the Board of Trustees. In such a case, a Fund’s value for a security may be different from the last sales price (or the latest closing price) and there is no guarantee that a fair valued security will be sold at the price at which a Fund is valuing the security.

The Trust follows the authoritative guidance for fair value measurements. FASB ASC 820, Fair Value Measurements and Disclosures (“ASC 820”), defines fair value, establishes a framework for measuring fair value, and expands disclosure requirements regarding fair value measurements. This standard emphasizes that fair value is a market-based measurement that should be determined based on the assumptions that market participants would use in pricing an asset or liability and establishes a hierarchy that prioritizes inputs to valuation techniques used to measure fair value.

Various inputs are used in determining the value of each Fund’s investments. These inputs are summarized in the three broad levels listed below.

Level 1 – unadjusted quoted prices in active markets for identical securities.

Level 2 – other significant observable inputs (including quoted prices for similar securities, quoted prices in inactive markets, interest rates, prepayment speeds, credit risk, etc.).

Level 3 – significant unobservable inputs (including a Fund’s own assumptions in determining the fair value of investments).

The Trust's policy is to disclose transfers between Levels based on valuations at the beginning of the reporting period. The portfolio may hold securities which are periodically fair valued in accordance with the Trust's fair value procedures. This may result in movements between Levels 1, 2 and 3 throughout the period. Pursuant to the Trust's fair value procedures noted previously, equity securities (including exchange traded securities and open-end regulated investment companies), exchange traded derivatives (i.e. options) and money market instruments are generally categorized as Level 1 securities in the fair value hierarchy. Fixed income securities and non-exchange traded derivatives are generally categorized as Level 2 securities in the fair value hierarchy. Investments for which there are no such quotations, or for which quotations do not appear reliable, are valued at fair value as determined in accordance with procedures established by and under the general supervision of the Trustees. These valuations are typically categorized as Level 2 or Level 3 securities in the fair value hierarchy.

The following is a summary of the inputs used as of September 30, 2020 in valuing each Fund's assets carried at fair value:

Investments in Securities at Value ⁽¹⁾	Level 1 - Unadjusted Quoted Prices	Level 2 - Other Significant Observable Inputs ⁽²⁾	Level 3 - Significant Unobservable Inputs	Total

⁽¹⁾ For detailed descriptions of country, sector and/or industry, see the accompanying Schedule of Investments.

⁽²⁾ As discussed above, the fair value triggers in place were affected on the date of these financial statements.

⁽³⁾ Participatory notes (P-notes) are generally valued based upon the value of a related underlying security that trades actively in the market and are classified as Level 2 in the fair value hierarchy.

Note 2- Foreign Investment Risk

The Trust invests in securities traded on exchanges outside the United States. Further, each Fund invests in securities issued by companies domiciled outside the United States, which may be subject to political, social and economic uncertainty to a greater extent and may also be affected by currency controls; different accounting, auditing, financial reporting, and legal standards and practices in some countries; expropriation; changes in tax policy; greater market volatility; differing securities market structures; higher transaction costs; and various administrative difficulties, such as delays in clearing and settling portfolio transactions or in receiving payment of dividends.
